## **BOOK SYNOPSIS**

This spiral-bound geography lab manual contains 30 lab exercises that are divided into logical sections. Each exercise comes with a list of key terms and learning concepts. We integrate links to Google Earth(tm) KMZ files available at [mygeoscienceplace.com](http://mygeoscienceplace.com) into the exercises, allowing you to actually experience and manipulate topographic maps in digital elevation mode relief as you work through problems. The Ninth Edition of the lab manual includes a new organization, new labs on climate change, soils, and rock identification, QR codes that link students to Pre Lab videos, as well as to color topographic maps, images, and animation media.
