BOOK SYNOPSIS

This book focuses on parents and teachers as adult learners, who should be growing and learning along with the children in their care. It lays out a theory of what parents and teachers need to care for children and themselves and then it shows how the author has assisted parents and teachers to put these theories into practice. McDermott relies on stories and listening to the voices of parents, teachers and children to make her case. She weaves together the latest theories and research with these stories. She uses narratives of actual school meetings, workshops, parent planning and discussion groups, testimonies, newsletters, and research of others in the field, to demonstrate applications of theory and research.
